

DANIEL NOAM

UNITY DEVELOPER

052-8984779 | danielnoam1999@gmail.com | [Linkedin](#) | [Portfolio](#)

Overview

I am a passionate Game Developer who turned a lifelong interest in game modification into a professional pursuit.

I have developed a strong technical foundation in C# and Unity. I enjoy the creative challenge of solving complex logic problems and building tools that help teams work faster.

Skills

Experienced with

- Unity (Profiling, Optimization, Shader Graph, Scriptable Objects, Custom Editors)
- C# (OOP, Design Patterns, LINQ, Coroutines, Delegates/Events)

Familiar with

- Version control (Git, GitHub, GitKraken)
- Unreal Engine
- Photoshop/Affinity
- Blender
- Game design documentation

Languages

- Hebrew
- English

Education

Game Development Program

Israel Animation College / 2023 - Present

A 30-month training program focused on Game Development, Game Art, and Game Design, covering programming fundamentals and 3D modeling. Gained extensive experience with industry-standard practices through collaborative team projects, and delivering projects from concept to completion.

Certificates

- Unity Junior Programmer
- Unity Essentials Pathway
- Unreal Engine For Beginners

Key Projects

Electro Grid / 2D Match-3

- Engineered a custom **Level Editor Tool** allowing to visually paint grids.
- Architected an **Event-Driven UI** system and used **ScriptableObjects** for data-driven level generation.
- Implemented **Haptic Feedback** and screen shake for polished "Game Feel."

Chicken Invaders Remake / 3D Rail Shooter

- Implemented a centralized **Object Pooling System** to pre-warm assets and eliminate runtime Garbage Collection spikes.
- Collaborated in a 5-person team using **Git**, managing merge conflicts and **integrating assets** from artists.
- Built a modular Weapon System using **ScriptableObjects**, allowing non-coders to tweak stats in the Inspector.

Project UMN / 3D Puzzle

- Developed a robust **Finite State Machine** to handle complex character movement and animation transitions.
- Created custom visuals using **Shader Graph** and implemented **Inverse Kinematics** for head tracking.

Work Experience

Customs Broker

Sky Freight Forwarding & Customs Clearance / 2020 - Present

Managed documentation under strict deadlines, collaborating with diverse teams to resolve regulatory issues and facilitate efficient clearance.

Commanding Officer

Israel Defense Forces / 2018 - 2020

Commanded 70+ personnel in a high-pressure environment; responsible for mentoring new staff and ensuring operational standards were met.
