skills

Experienced with

- Unity (Profiling, Optimization, Scriptable Objects).
- C# (OOP, Design Patterns, LINQ, Coroutines, Delegates/Events).

Familiar with

- Version control (Git, GitHub, GitKraken)
- Unity (Custom Editors, Shader Graph)
- AI Workflows (Code Generation, Asset Creation)
- Firebase (Analytics, Remote Control)
- Photoshop/Affinity
- Unreal Engine
- Blender
- Game design documentation

Overview

Game development student at Israel Animation College with strong C# and Unity fundamentals, seeking junior developer role. Background in high-pressure team management and technical problem-solving.

Key Projects

Electro Grid / 2D Match-3

- Developed a robust Grid System with a custom Editor Tool allowing designers to visually paint grids and easily create levels.
- Decoupled game logic using Events and implemented Haptics for polished “Game Feel”.
- Integrated Firebase to track player retention and perform live balance tuning (difficulty, haptics) without app updates.

Chicken Invaders Remake / 3D Rail

- Implemented a centralized Object Pooling System to pre-warm assets and eliminate runtime garbage collection spikes.
- Collaborated in a 5-person team using Git, managing merge conflicts and integrating assets from artists.
- Built a modular Weapon System using ScriptableObjects and composable behaviors, allowing non-coders to tweak stats in the Inspector.

Project UMN / 3D Puzzle

- Developed a robust Finite State Machine to handle complex character movement, input handling, and animation blend trees seamlessly.
- Implemented Inverse Kinematics (IK) for natural head tracking that follows the camera and mouse cursor dynamically.
- Created custom visuals using Shader Graph, including a “Dither Fade” shader and dynamic emission effects.

Work Experience

Customs Broker

2020 - Present

Sky Freight Forwarding & Customs Clearance

- Managed documentation under strict deadlines, collaborating with diverse teams to resolve regulatory issues and facilitate efficient clearance.

Commanding Officer

2018 - 2020

Israel Defense Forces

- Commanded 70+ personnel in a high-pressure environment; responsible for mentoring new staff and ensuring operational standards were met.

Education

Game Development Program

2023 – Present

Israel Animation College

A 30-month training program focused on Game Development, Game Art, and Game Design, covering programming fundamentals and 3D modeling. Gained extensive experience with industry-standard practices through collaborative team projects, delivering titles from concept to completion.
