

Daniel Noam

Unity Technical Artist

052-8984779 | danielnoam1999@gmail.com | [Linkedin](#) | [Portfolio](#) | [Github](#)

Profile

Technical Artist with a strong foundation in C# and Unity. I specialize in bridging the gap between art and code by developing custom editor tools and using Shader Graph to achieve specific visual goals.

Education

Game Development Program: Israel Animation College / 2023 - Present

A program focused on Game Development, Game Art, and Game Design, covering programming fundamentals and 3D modeling.

Certificates: Unity Junior Programmer, Unity Essentials Pathway, Unreal Engine For Beginners

Key Projects

Electro Grid / 2D Match-3

- Built a grid system and a custom Editor tool for visual level design.
- Decoupled game logic using C# events and integrated haptic feedback.
- Integrated Firebase for analytics and remote configuration (tuning difficulty and haptics).

Chicken Invaders Remake / 3D Rail Shooter

- Implemented an object pooling system to eliminate runtime garbage collection spikes.
- Built a modular weapon system using ScriptableObjects for easy stat adjustments in the Inspector.
- Collaborated in a 5-person team using Git for version control and asset integration.

Work Experience

Technical Artist: Superplay (Disney Solitaire) / May 2026 - Present

Customs Broker: Sky Freight Forwarding & Customs Clearance / 2020 - 2026

Commanding Officer: Israel Defense Forces / 2018 - 2020

Technical Skills

Programming Languages: C#

Game Engines: Unity, Unreal Engine

Art & Design Software: Blender, Photoshop, Affinity

Tools & Services: Git, Firebase

AI Workflows: Code Generation, Asset Creation

Languages

Hebrew: Native

English: High level (Professional working proficiency)
